JOURNAL OF APPLIED GEOPHYSICS

Contents Volume 42, 1999

Saltwater intrusion into the freshwater aquifer in the eastern shore of Virginia: a reconnaissance electrical resistivity survey
A.A. Nowroozi, S.B. Horrocks and P. Henderson 1
FM-CW radar performance in a lossy layered medium
R. Deng and C. Liu 23
Automatic 1D interpretation of DC resistivity sounding data
E.A. Muiuane and L.B. Pedersen 35
Using Maple V to derive correct analytical formulae for gravity anomaly derivatives over anticlines and synclines with hyperbolic density contrast
Pratibha and Kamal 47
Seismic image of the ice–bedrock contact at the Lobbia glacier, Adamello Massif, Italy
L. Levato, L. Veronese, A. Lozej and E. Tabacco 55

Book reviews
Analysis of Geophysical Potential Fields: A digital signal processing approach
Y. Li 65
Theoretical Global Seismology
J. Fokkema and K. Wapenaar 67
An approximate inversion algorithm for time-domain electromagnetic surveys
C.G. Farquharson, D.W. Oldenburg and Y. Li 71
A stochastic wavefield solution of the acoustic wave equation based on the random Fourier–Stieltjes increments
J.O. Parra, R. Ababou, M.J. Sablik and C.L. Hackert 81
Dispersion and attenuation of acoustic waves in randomly heterogeneous media
J.O. Parra, C.L. Hackert, R. Ababou and M.J. Sablik 99
Gravity terrain corrections — an overview
D.A.G. Nowell 117
The Magnetic Field of the Earth's Lithosphere: the Satellite Perspective
R.A. Langel and W.J. Hinze 135

Special Issue
Macro-Model Independent Seismic Reflection Imaging

Karlsruhe Workshop on Macro-Model Independent Seismic Reflection Imaging
Karlsruhe, Germany, 14–15 February 1999
Sponsored by SEG and EAGE

edited by
P. Hubral

Preface 137
When Reflections are not Hyperbolas and Reflectors are not Points
O. Yilmaz 139
Restricted optimization: a clue to a fast and accurate implementation of the Common Reflection Surface Stack method
E.G. Birgin, R. Biloti, M. Tygel and L.T. Santos 143
Prestack depth imaging via model-independent stacking
A. Druzhinin, C. MacBeth and K. Hitchen 157
Homeomorphic imaging approach — theory and practice
B. Gelchinsky and S. Keydar 169
Multifocusing homeomorphic imaging. Part 1. Basic concepts and formulas
B. Gelchinsky, A. Berkovitch and S. Keydar 229

Multifocusing homeomorphic imaging. Part 2. Multifold data set and multifocusing
B. Gelchinsky, A. Berkovitch and S. Keydar 243
Seismics and optics: hyperbolae and curvatures
G. Höcht, E. de Bazelaire, P. Majer and P. Hubral 261
Application of multifocusing method for subsurface imaging
E. Landa, B. Gurevich, S. Keydar and P. Trachtman 283
Common-reflection-surface stack — a real data example
J. Mann, R. Jäger, T. Müller, G. Höcht and P. Hubral 301
Multifocus moveout revisited: derivations and alternative expressions
M. Tygel, L.T. Santos and J. Schleicher 319
Estimation of kinematic wavefront characteristics and their use for multiple attenuation
J. Zaske, S. Keydar and E. Landa 333

Contents Volume 42, 1999 347
